

 **grant manager**  
northern lights software

**When every penny counts, you need to account for every penny. Grant Manager can do that for you accurately and efficiently.**

**Grant Manager** is currently used in thousands of US university departments and abroad. This reasonably priced, customizable, comprehensive software program is renowned for streamlining administrative tasks. It ensures that all calculations are executed quickly and accurately. Grant Manager offers real-time results to show you how much money is left in each separate funding source, and more:

- Provides instant, real-time, accurate grant balances
- Creates indirect and fringe cost calculations accurately and automatically
- Allows simple network installation for system administrators with standard two-user network license
- Offers active Internet connectivity with automatic updates, email and Web link capabilities, reporting directly to the Web or email
- Includes Cost Center calculations to track expenditures across grants and categories
- Encompasses a flexible report generator to run standard or customizable reports with options to seamlessly generate Word, Excel, PDF, HTML, XML and image output files
- Features many backend connectivity options to Oracle, PeopleSoft, SAP, plus!
- Runs as a standalone or networked program, with a Microsoft Windows customizable, modern interface
- Offers comprehensive security settings to limit users' access to only certain grants or specific functions
- Top-tier tech support with toll-free unlimited phone support, start-up Internet training, automatic free minor version updates, and live support
- Also available as a highly secure hosted service – nothing to install, nothing to manage – all you need is a browser for access at any time, from any computer, from anywhere in the world.
